

Airl is my absolute favorite radio station. As the best Positive Alternative station in the nation, they play the best Positive Alternative music!

If a LPFM broadcaster were to displace Airl, this community wouldn't have access to the best Christian radio station in the nation since we are listening to Airl via a local FM translator. This would be a mistake and a problem which could be prevented. Airl is a great radio station with better influences and messages than today's popular alternative music.

The service provided by Airl is in the public interest because Americans are a religious people. This country was founded by people who wanted to escape religious persecution and live their religion freely. By taking Airl off the airwaves, I believe the public would have been done a great injustice. It would be violating the first amendment, freedom of speech. Let Airl speak for the Christians of the United States.
